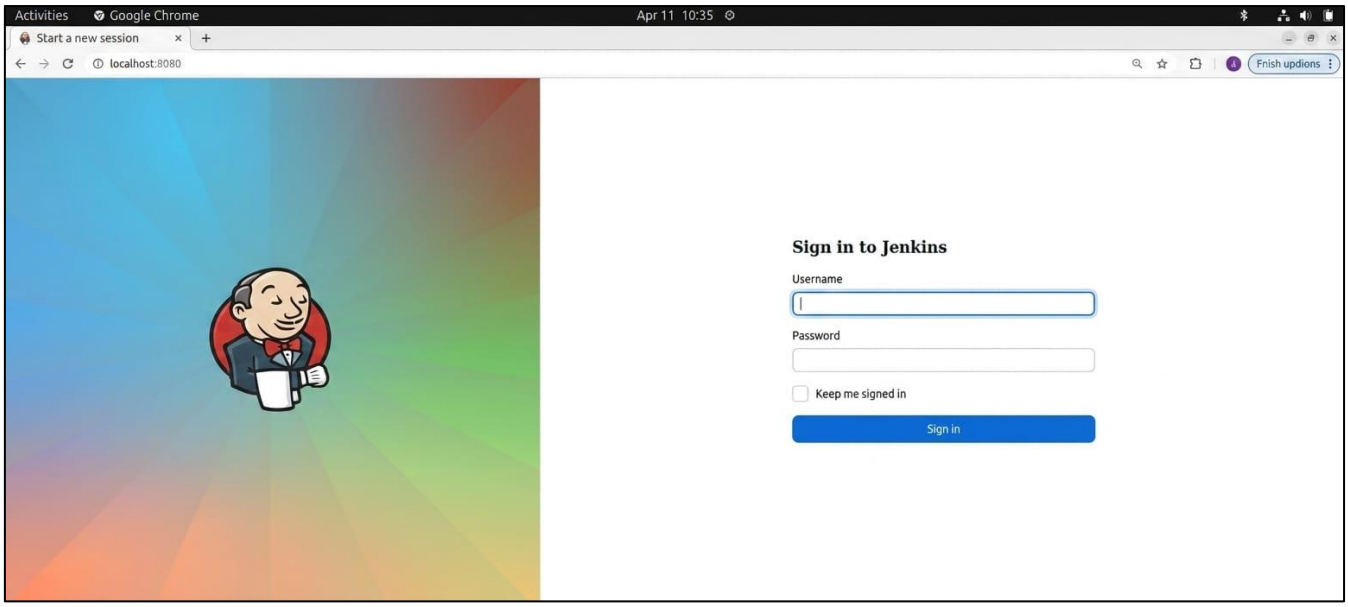
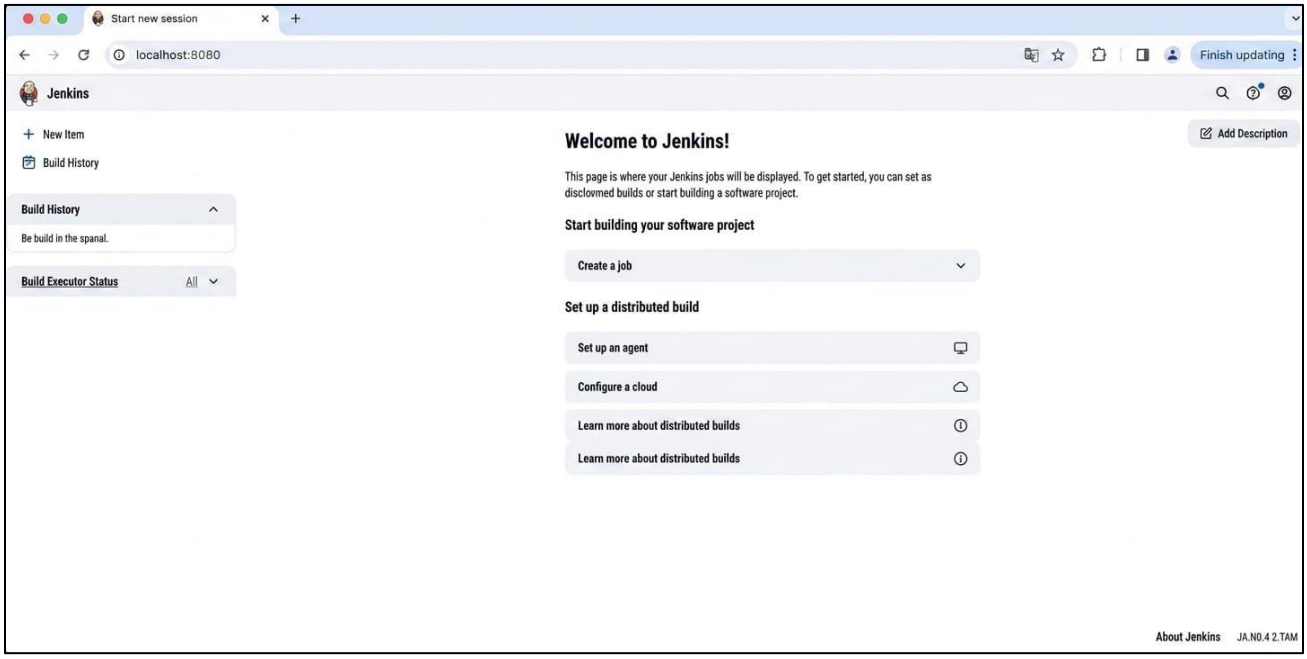
Jenkins Pipeline Setup

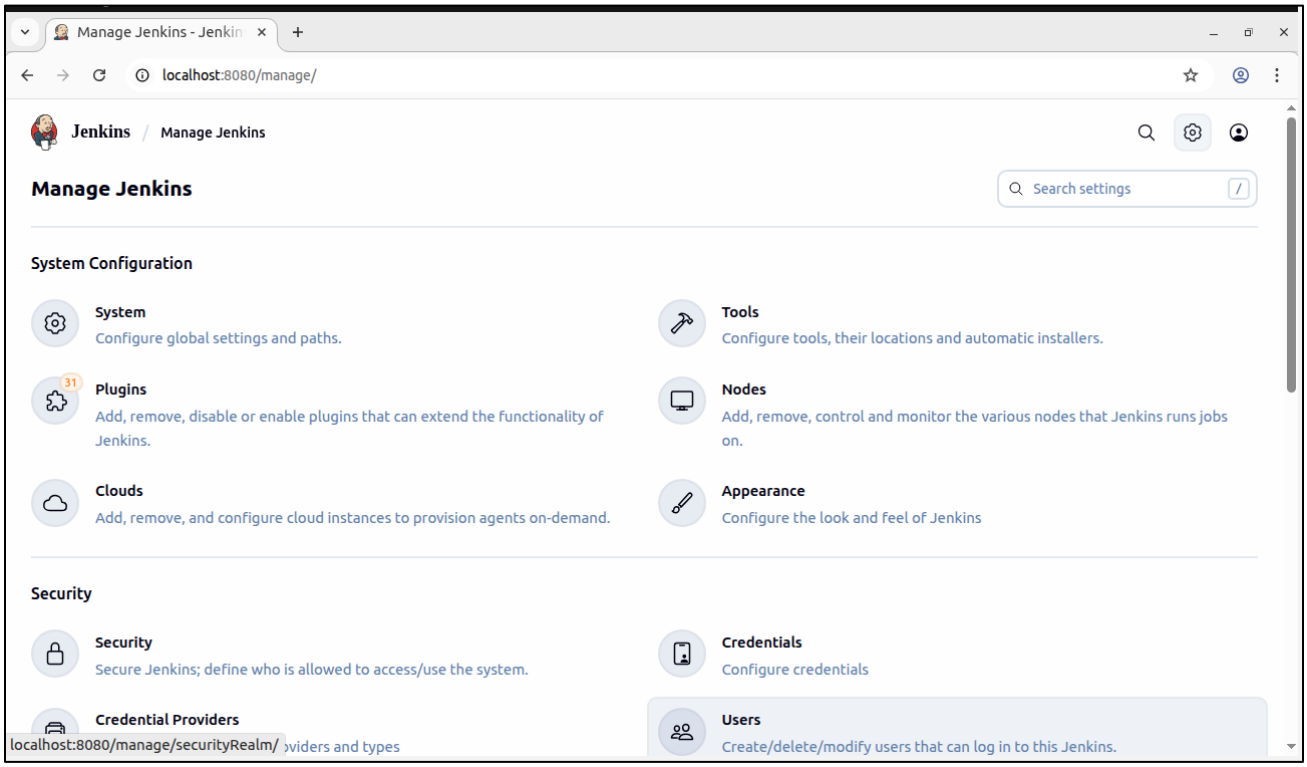
Step 1: Open Jenkins Dashboard and login with the respective Username and Password and click on Sign-In.



The Dashboard will be displayed like the below figure.

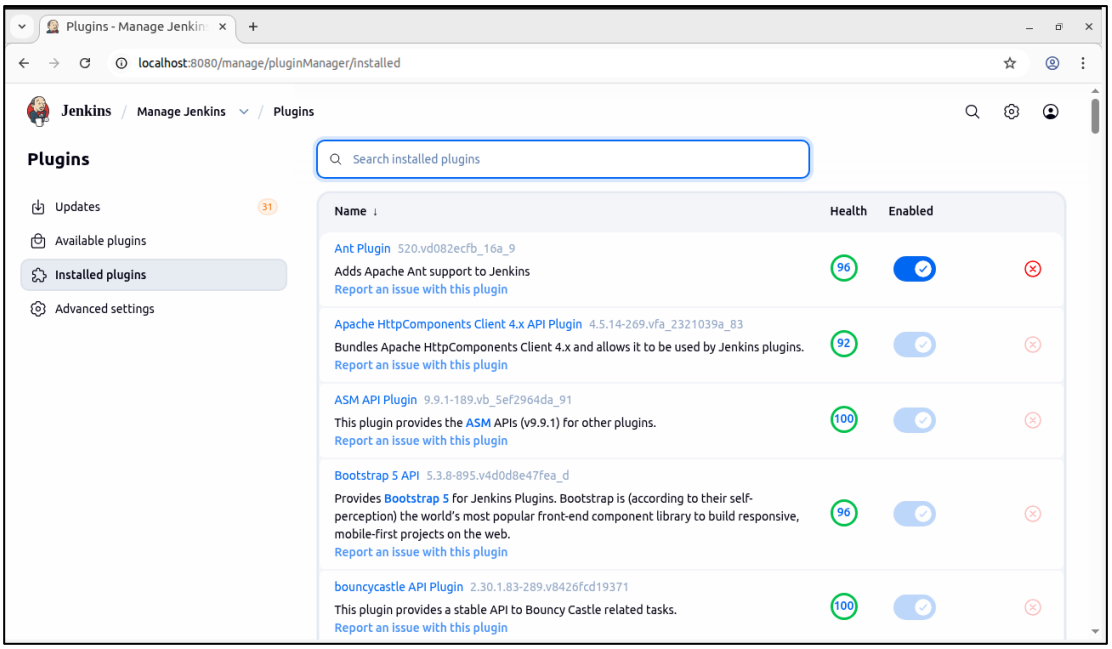


Step 2: From the dashboard, click on "Manage Jenkins" by selecting the settings icon located at the top right.

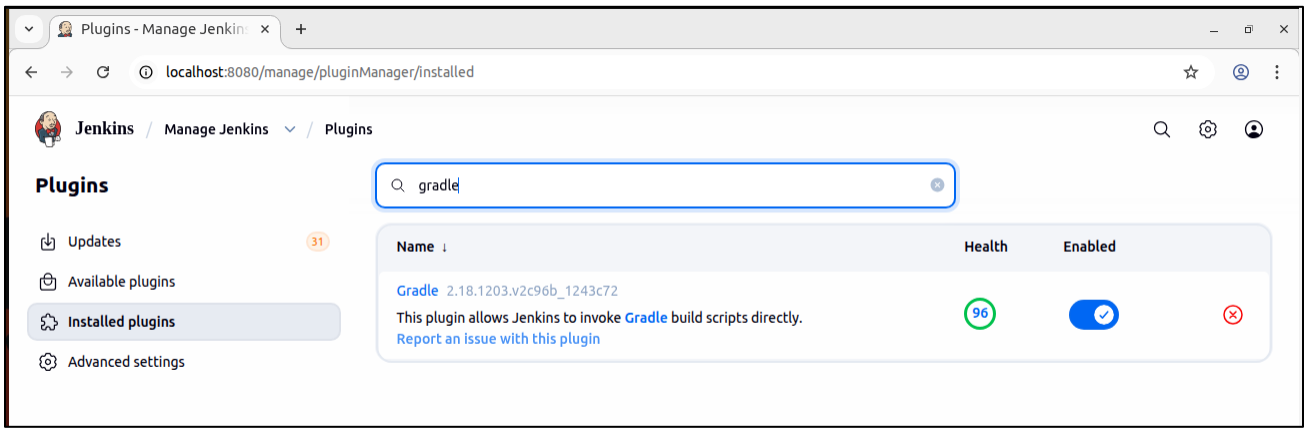


Step 3: Navigate to Plugins and download the required plugins i.e.

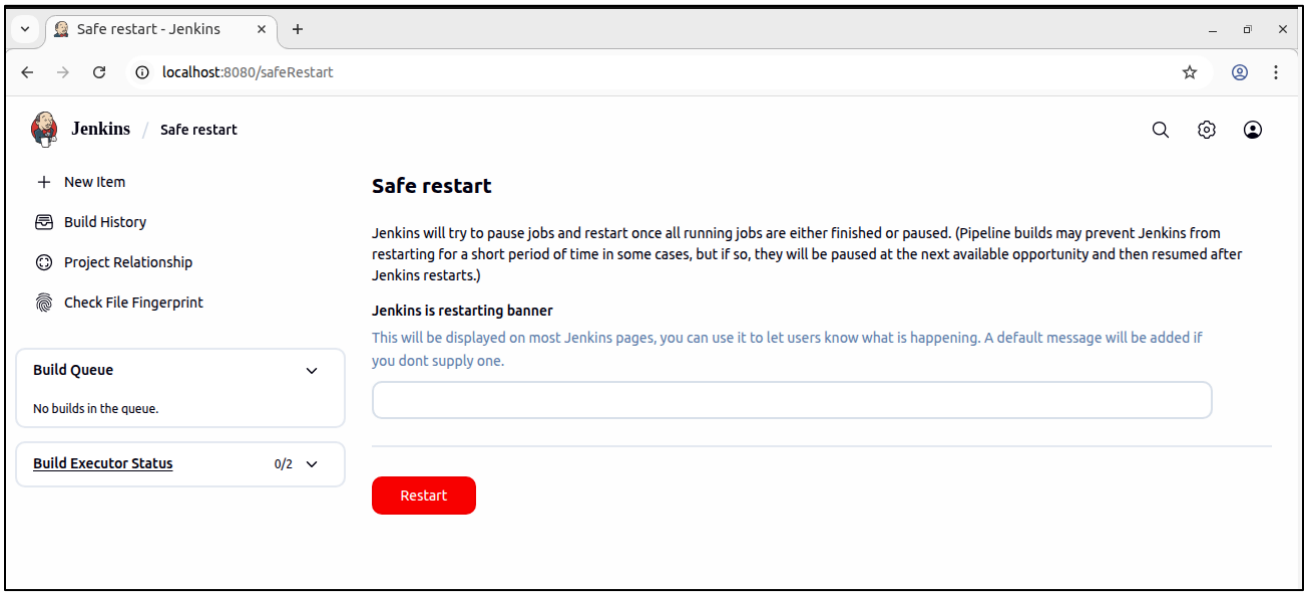
1. **Maven Integration**
2. **GitHub Integration**
3. **Pipeline Stage View**
4. **Gradle**



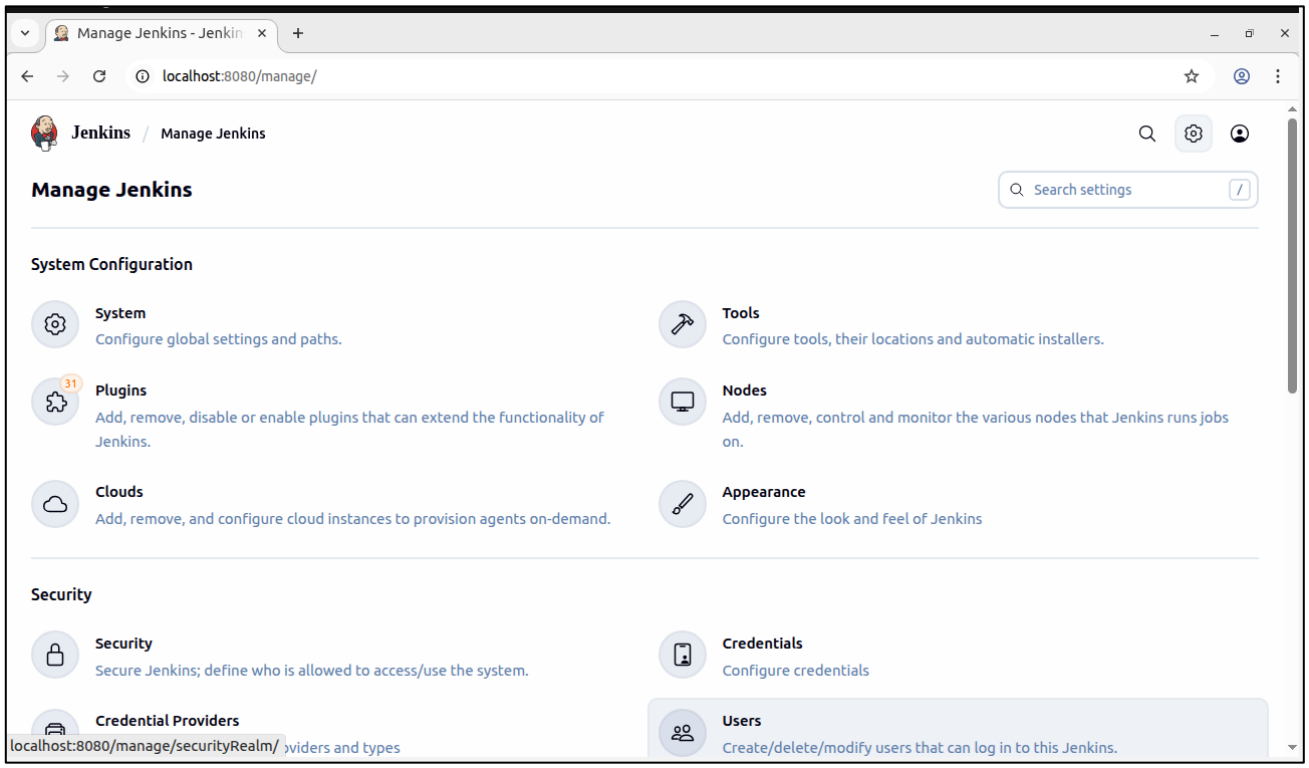
Step 4: We need to Verify Gradle Plugin as it would already be installed.



Step 5: Once the installation is complete restart Jenkins by visiting http://localhost:8080/safeRestart



Step 6: We need to Configure Tools thus Go to Manage Jenkins → Tools. Scroll down and click Add JDK.



Manage Jenkins - Jenkin
localhost:8080/manage/
Jenkins / Manage Jenkins
Manage Jenkins
Search settings
System Configuration
System
Configure global settings and paths.
Tools
Configure tools, their locations and automatic installers.
Plugins
Add, remove, disable or enable plugins that can extend the functionality of Jenkins.
Nodes
Add, remove, control and monitor the various nodes that Jenkins runs jobs on.
Clouds
Add, remove, and configure cloud instances to provision agents on-demand.
Appearance
Configure the look and feel of Jenkins
Security
Security
Secure Jenkins; define who is allowed to access/use the system.
Credentials
Configure credentials
Credential Providers
Users
Create/delete/modify users that can log in to this Jenkins.

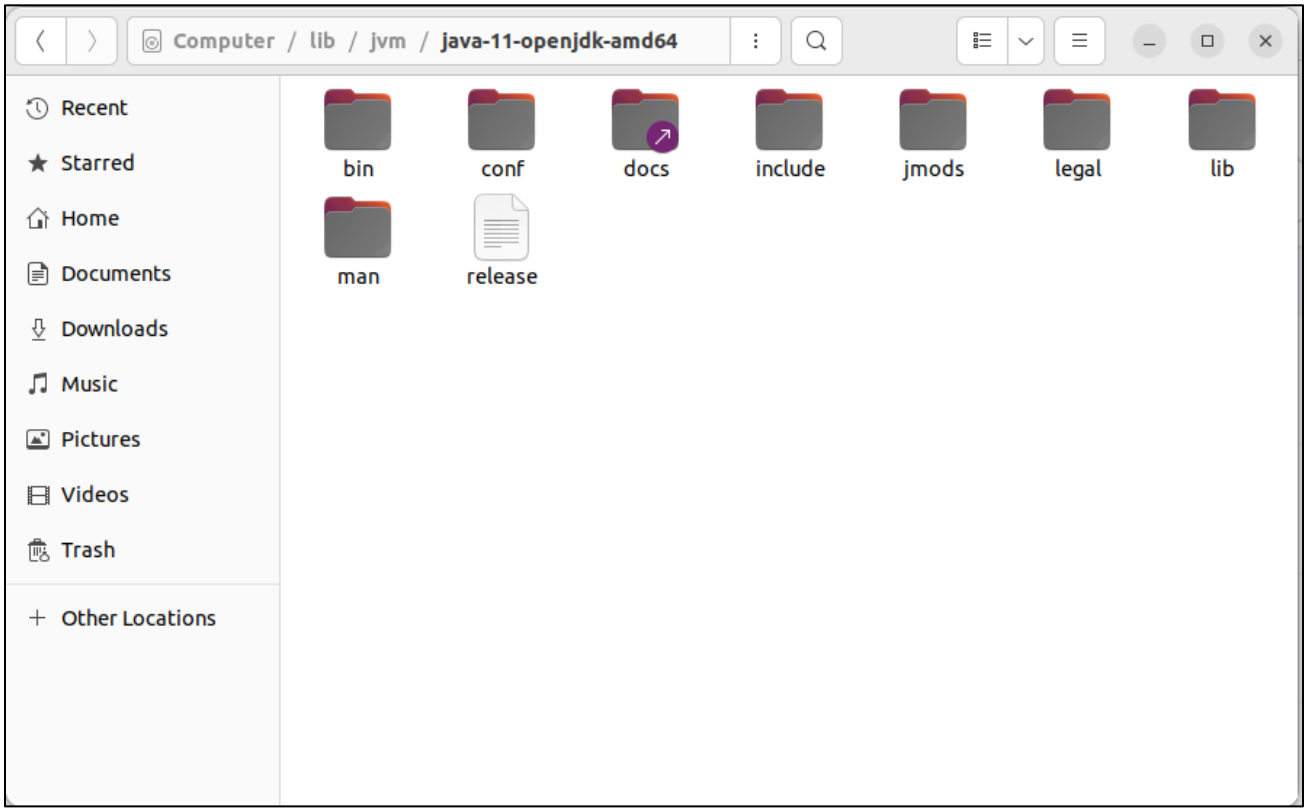
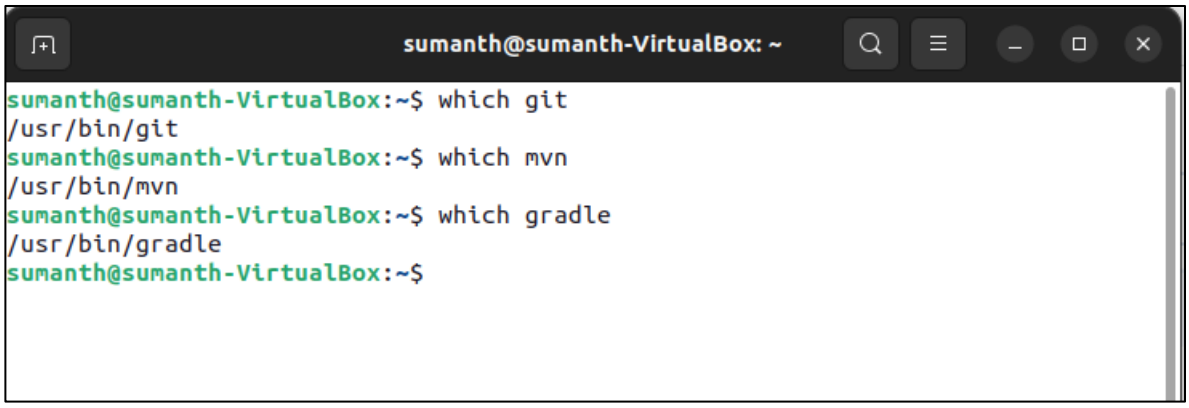
git
Installf automatically
Save
Apply

Enter the name and address

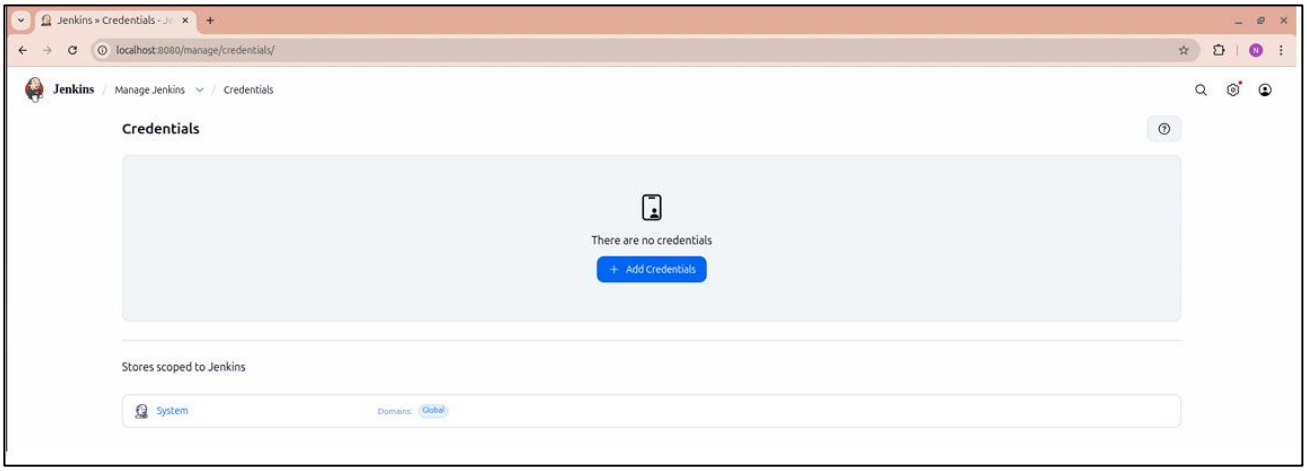
The address of the JDK can be found in your files -> other location -> computer -> lib -> jvm -> jdk



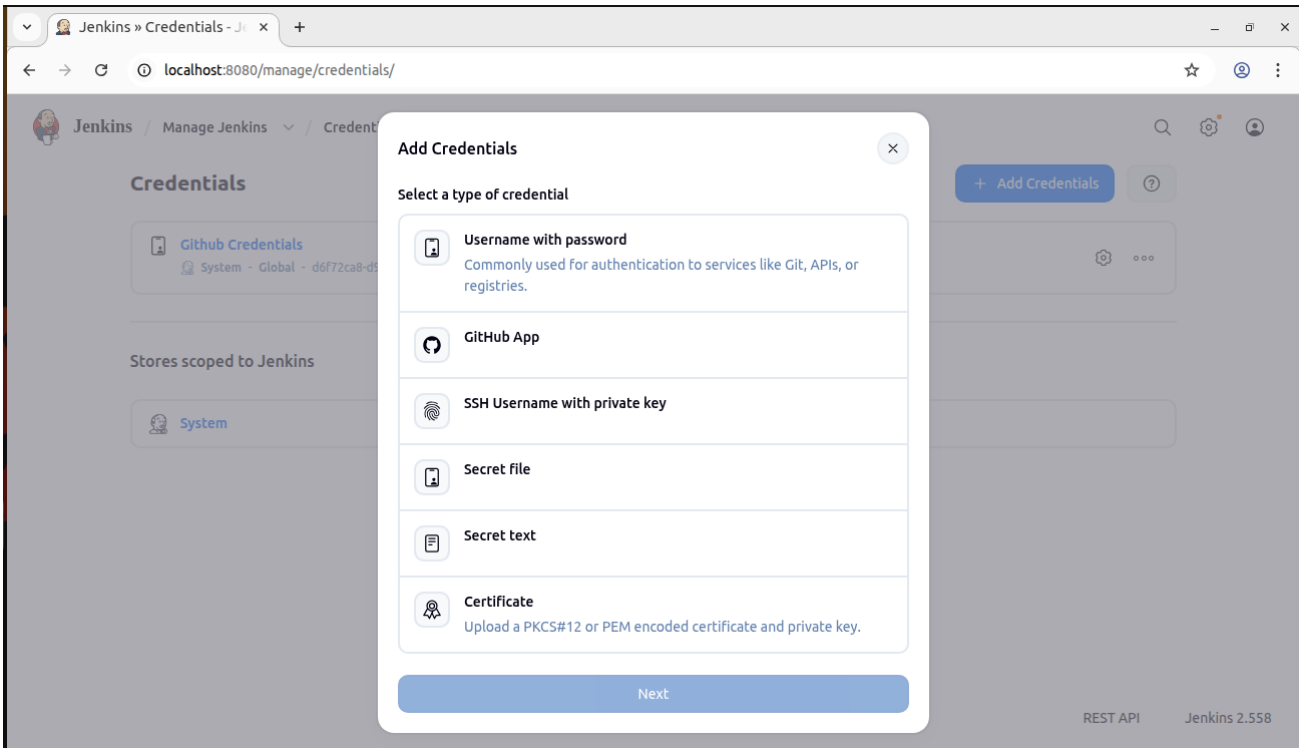
Step 7: Find installation paths for Git, Maven, and Gradle using terminal. Enter these paths in Jenkins.



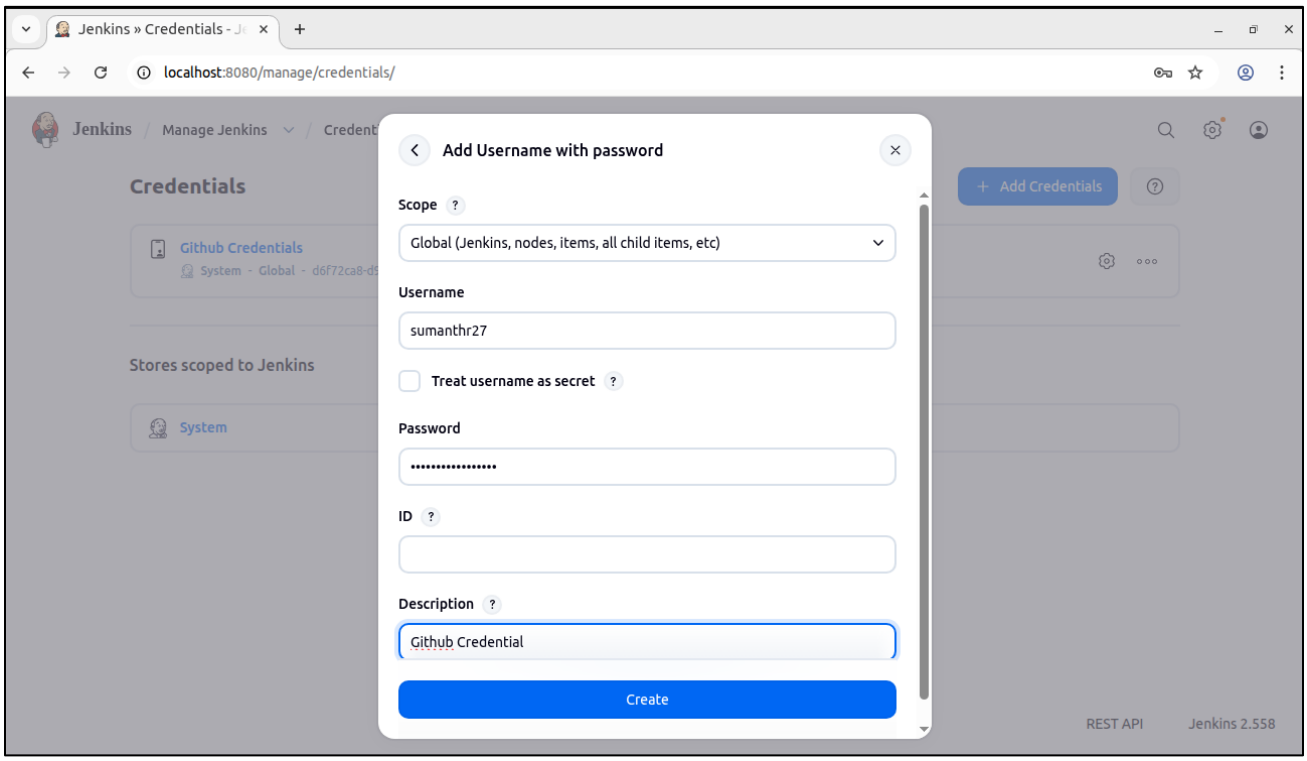
Step 8: To Add GitHub Credentials, we need to go to Manage Jenkins and click on Credentials. Here we need to select Username with Password. Here we give the GitHub Username and Password and description as "GitHub Credentials"



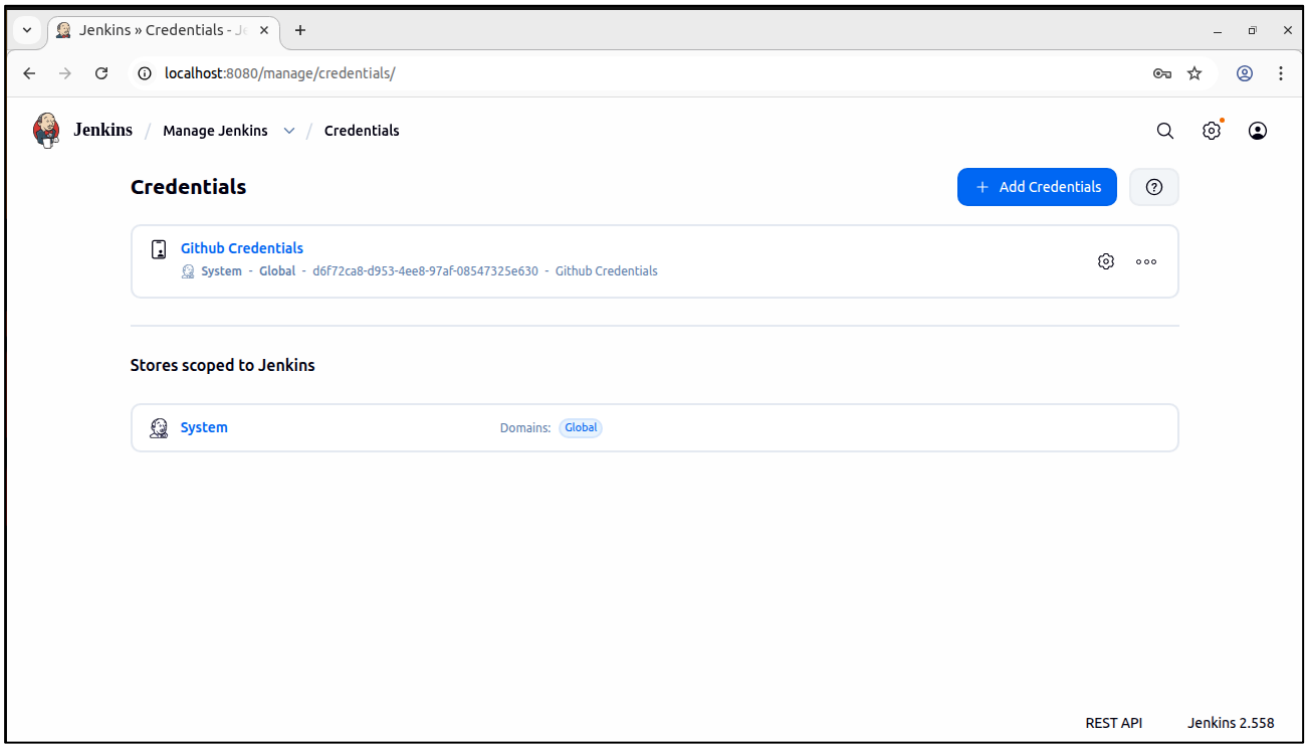
Here we Select Username with Password as the type of credential



Here we give the Username and Password of GitHub and name it as GitHub Credential



Thus ,the GitHub Credentials will be Successfully created as below



Jenkins » Credentials - J
